

HEXBEAM SP6CYN TECHNOLOGY ANTENNA

40m kit Hexbeam assembly manual

A set of 40 - meter putty for six strand hexbeam.

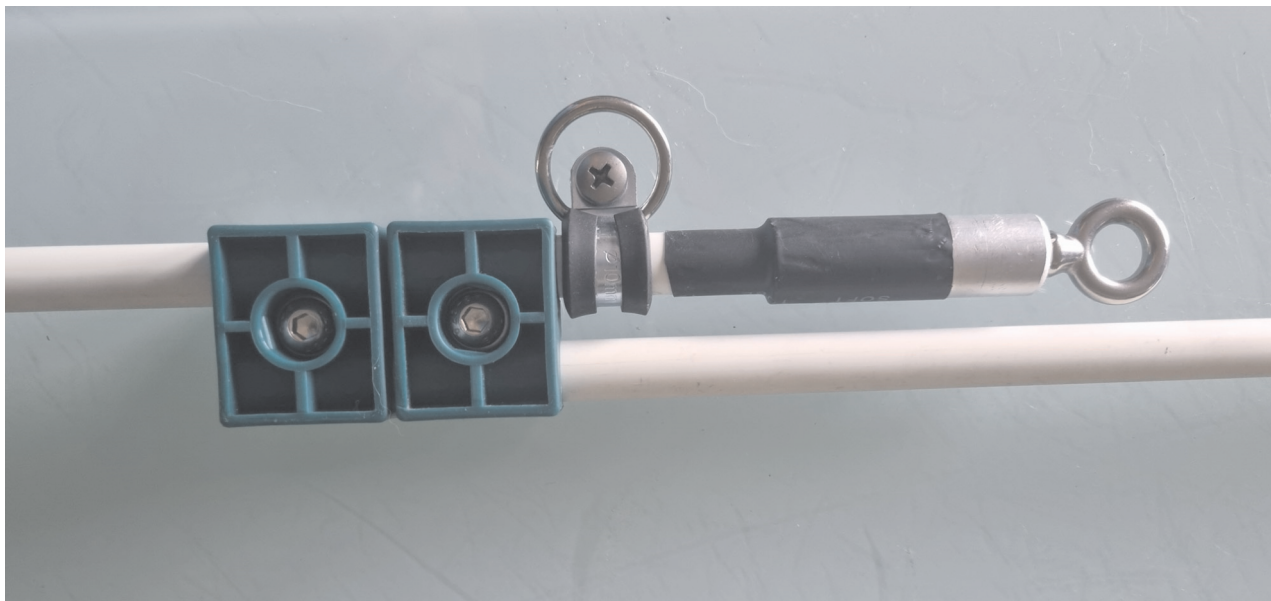

The 40m element is a bent dipole, mounted independently of the other bands by a 25 - ohm balun specially designed for this purpose. A set of 40 meters of putty works in the range from 7000 - 7200 KHz

Antenna tested at a height of 10 meters using the
RigExpert AA-650 ZOOM
